

Redevelopment of the Former Grange School, Warmley

The Site

Welcome to this public exhibition.

South Gloucestershire Council is proposing to submit a planning application for redevelopment of the Former Grange School site, Tower Road North, Warmley. The Council has appointed a design team including sports, landscape, engineering and masterplanning specialists to develop plans for the redevelopment of the site.

Vision

The Council's objective for The Grange site is to deliver housing on an empty site in an urban location with other benefits such as public open space and biodiversity enhancements, as well as supporting the return of sport to the site. The vision for sport is to deliver a revitalised Sports Hub that will provide accessible, good quality facilities that will deliver a benefit to sport and the local area

We are seeking to transform the Former Grange School into a sports hub as well as a development of 161 high quality homes including affordable housing and self-build, sited within a landscape-led masterplan with new green spaces and ecological areas.
